

VPN Setup

1. Open <https://connect.tamu.edu/+CSCOE+/login.html> on your web browser.
2. Enter your NetID (not the numeric UIN) and password. Click on Login. Approve the Duo authentication request (just like you do when you login to eCampus).

VPN users are required to use Duo NetID Two-Factor Authentication. Enroll now at <https://duo.tamu.edu>.

Login

3. Download and Install Cisco AnyConnect Client based on your OS. Expand the Instructions (a plus icon) for installation instructions.

4. After you install the client, search for Cisco AnyConnect on your laptop and launch the application.
5. Create a new connection to TAMU network (connect.tamu.edu). Click on connect.

6. Enter your NetID and password and click on Ok.

Please enter your username and password.
